Career Objective:

To obtain a challenging position as a Full Stack Developer where I can leverage my expertise in front-end and back-end technologies—including **HTML, CSS, JavaScript, PHP, jQuery, Node.js, Express,** and **MySQL**—to build responsive, high-performance web applications. I aim to contribute to innovative projects, continuously enhance my technical skills, and deliver scalable and efficient software solutions that add value to the organization.

Education:

*Master of Computer Science(M.Sc.)–
Expected Completion 2027*

- Tulsi College of Computer Science & Information Technology (Expected in 2027)
- Beed, Maharashtra

Bachelor of Computer Science (B.C.A) - 8.4 CGPA

- Balbhim Arts, Science and Commerce College (2022–2025)
 - Beed , Maharashtra
-

Professional Experience:

- **Full Stack Developer Intern** - OwnTap Pvt Ltd (April 2024 – October 2024)
 - Proactive **Full-Stack Web Development Intern** with hands-on experience in building scalable financial software. Successfully developed a billing and collections platform using **PHP/MySQL**, focusing on improving payment processing efficiency and creating responsive user interfaces with **Bootstrap**.
-

Projects:

1) BILLING SYSTEM PROJECT

- A billing system is a Platform designed for organizing and managing a customer's collection and payment process.
- This project was developed using languages and technologies such as **HTML, CSS, Bootstrap, JavaScript, jQuery, PHP** and **MySQL**.

2) CODE-QUEST

- Code Quest is a web-based online examination platform designed to conduct tests. It allows users to register, log in, take subject-wise exams, and receive instant results.
- This project was developed using languages and technologies such as **HTML, CSS, Bootstrap, JavaScript, jQuery, PHP** and **MySQL** .

3) ECOMMERCE CLOTHING WEBSITE

- This is a modern, responsive e-commerce frontend website designed to provide users with a seamless and intuitive shopping experience.
- Built using **HTML, CSS, JavaScript**, and optionally frameworks like **Bootstrap** , the frontend delivers a clean, user- friendly interface that mirrors professional online stores.

4) AIRBNB

- An Airbnb clone is a web application that allows users to list properties (homes, rooms, apartments) for rent, search listings by location Book stays and communicate with hosts .User authentication (sign up, login, sessions).
- This project was developed using languages and technologies such as **Node.js, express** and **mongodb**.

Technical Skills :

- Front-End: HTML, CSS, Bootstrap, JavaScript, React.js, jQuery
- Back-End: PHP, Node.js, Express.js
- Database: MySQL, MongoDB
